

## Zaycon Foods

Consumers are getting more savvy and finding ways to get the healthy food they desire for lower prices. Zaycon Foods is a fast-growing company that is responding to the demand for healthier, more affordable, quality food. Coming October 11th to St. Petersburg, Seminole and Clearwater, Zaycon will hold a delivery day for its highly popular chicken breast event. Customers must register online to pre-order bulk quantities of boneless, skinless chicken breasts that are both hormone-free and antibiotic free for \$1.84 per pound. The chicken comes fresh, not frozen, and is only days from the supplier. The product is sold in 40-pound cases and so buyers must be willing to do their own wrapping and freezing. Currently there are two events per year, but plans are in place to increase that soon. There is no cost to sign up and order, and events typically sell out before the delivery date.
